## IMPLANT PROSTHESES

We are committed to providing dental profession with state of the art and cost effective implant prostheses. Our team of expert implant specialists have the training, skill and experience to assist right from case planning and designing and help you in all steps to the final delivery of the prostheses.

We believe that prosthetic driven implant placement is the key to successful implant treatment

Dentcare is a one stop shop for all implant restorations. We have a range of implant solutions for you. Ranging from implant crown and bridge, implant hybrid dentures, overdentures, castable and milled custom abutment in Titanium and Zirconia.

## Benefits

- » Re-establishes lost lip support and therefore, minimizes the appearance of wrinkles
- » Preserves the bone
- » Eliminates the discomfort caused by ill-fitting dentures
- » With increased stability, Dental Implants help restore natural chewing capacity

# IMPLANT

CROWN AND BRIDGE

## **BENEFITS**

1. Single unit toothless gap with healthy adjacent teeth
2. Preserves the natural teeth without any tooth preparation
3. Highly esthetic

## **INDICATION**

1. Can successfully restore all forms of partial and complete edentulism
2. Used for distal extension cases (Kennedy Class 1 & 2)
3. Patients who cannot restore removable restorations
4. Patients with high esthetic and functional demands

**IMPLANT MALO BRIDGE**

## **BENEFITS**

1. Light weight frame crafted to mimic the peridontium
2. Options of choosing different worktypes ranging from PFM to Metal free crowns
3. Done with high technology driven manufacturing machines

## **INDICATION**

1. Can successfully restore all forms of partial and complete edentulism with reduced ridge height
2. Patients with high esthetic and functional demands with reduced ridge height

## DC IMPLANT HYBRID DENTURE

Dental implants are a popular and effective way to replace missing teeth and are designed to seamlessly blend in with the other teeth. They are an excellent long-term option for restoring perfect smile and functionality.

DentCare provides options to fabricate Implant Hybrid framework for Dentures and Ceramic restorations in PEEK, Titanium and Cobalt-Chrome using the latest CAD/CAM technologies.

## **BENEFITS**

1. Does not require the use of adhesive
2. Lightweight fixed detachable denture

## **INDICATIONS**

1. Reduces the impact force of dynamic occlusal loads,
2. Is less expensive to fabricate and highly esthetic
3. Can be successfully used by a combination of tilted and axially placed implants in partial edentulism in the posterior part of resorbed maxillae.
4. Eliminates the discomfort caused by ill-fitting dentures
5. They help restore natural chewing capacity

## PRECISION ATTACHMENT

A Dental Precision Attachment is a connecting link between fixed and removable partial dentures, as it incorporates features common to both types of prostheses. A Dental Precision Attachment helps connect removable partial dentures to a fixed bridgework under a male / female locking mechanism. The 'male' part is fixed to the crown or bridgework, while the 'female' part is included within the removable partial denture and engages the 'male' part. The male part of Dental Precision Attachments is often a high strength precious alloy while the female part consists of a more elastic alloy.

## Benefits

- » Aesthetics (Labial / Buccal clasp arms can be avoided)
- » Minimization of trauma to soft tissue
- » High retention
- » Periodontal health can be effectively maintained
- » Less force on abutment teeth
- » Stable and offers improved prosthetic longevity

## Indications

- » Obturator prostheses
- » Fixed bridgework (Key-Keyway attachment / Stress Breaker)
- » Telescopic overdentures
- » Unilateral partial dentures
- » Bilateral partial dentures
- » Andrews bridge
- » Implant-supported overdentures
